

BFT

Powering the
BNK TO THE FUTURE.COM®
Online Investment Platform

BF TOKEN (BFT)

WHAT IS BNKTOTHEFUTURE.COM?

BnKToTheFuture.com is the largest online investment platform for investing in the equity and tokens of the most valuable Fintech, Bitcoin and Blockchain companies. BnK To The Future has facilitated more than \$260 million USD of investments for more than 48,000 qualifying investors in more than 100 of the most valuable companies in the industry including BitFinex, Kraken, BitStamp, ShapeShift, BitPay and over 100 others.

BNK TO THE FUTURE'S FUTURE VISION

BnK To The Future's next goal is to give our investors the opportunity to trade their equity by launching a compliance-driven, Blockchain based trading market for buying and selling the most valuable companies in the Bitcoin, Blockchain and FinTech sector. It is also launching the BF Token (BFT), a membership and rewards token to create a fairer, more transparent and efficient marketplace on BnKToTheFuture.com. The team aims to support the growth of companies and technologies involved in the future of finance in a more decentralized, yet compliance-driven way.

THE MARKET OPPORTUNITY

- 01.** Fintech and blockchain companies have experienced explosive growth in recent years. Examining and vetting each company that wants to be listed on the BnKToTheFuture.com platform has become difficult to achieve in a timely, efficient and thorough manner through our current fully centralized approach.
- 02.** Under the current infrastructure, it is difficult to provide efficient, real-time company updates to investors who want to stay informed of the latest news on their investments.
- 03.** The industry is facing both increased scrutiny and regulatory challenges. Any blockchain solution must maintain compliance with securities laws under various jurisdictions. We are a registered securities business with ownership stakes in other licensed companies including a U.S. broker-dealer and an SEC registered Alternative Trading System (ATS) amongst others.

Friday, 16 Feb. 2018
Public purchase date for
whitelisted purchasers begins

WHAT ARE BF TOKENS (BFT)?

BFT is a due diligence-driven membership and rewards token. It effectively addresses the key challenges to create a transparent and efficient scalable marketplace.

WHY THE BF TOKEN?

By incentivizing the crypto community to engage in due diligence, BFT provides a scalable system for identifying, listing and trading top companies in the industry. It also enables fast and efficient facilitation of a live secondary market environment with information updated in real-time.

HOW DOES BFT WORK?

- 01.** BFT facilitates a more decentralized process for listing investment opportunities on the BnKToTheFuture.com platform.
- 02.** BFT creates a community-enhanced due diligence process for deals listed on the BnKToTheFuture.com platform whereby token holders identify, select and research the best deals in the industry for a more streamlined process.
- 03.** BFT incentivizes token holders (both community and companies on the platform) to provide frequent and real-time investor updates for greater transparency.

BFT BENEFITS FOR TOKEN HOLDERS

Token holders cannot invest in companies through the platform without qualifying as investors; however, the BF tokens provide VIP access to certain portions of the platform previously open only to investors to earn tokens by providing due diligence support, deal-flow selection and investor updates.

TOKEN DISTRIBUTION

1,000,000,000 BFT Capped Token Supply
1 BFT = \$0.10 Token Sale price
Everybody has paid the same **\$0.10 price**.
No bonuses, no discounts and no back-hand deals.
